LA RADIO STUDIO

Stunning Venue.
Serious Radio.
Uncompromising Studio.

An innovative resource supplying an upscale, acoustically sound, state-of-the-art radio studio to radio shows, radio stations, radio developers, podcasters - specially designed to address the vast array of emerging media technologies.

We Said, "What If"... and These are the Results!

We invite you to step into a Radio Studio with amenities guaranteed to ignite your imagination; truly offering the best of all worlds. ***LA Radio Studio*** was established to accommodate a wide spectrum of production needs: full broadcasts to points beyond via ISDN, as well as the simplest voice tracking projects, all at competitive rates. Permanent residency for projects are welcome. We collaborate with each client to provide the support needed to produce a daily or weekly radio show.

A New Concept Engaging New Ideas in Radio, and Beyond.

With the growth of HD Radio, ***LA Radio Studio*** provides an alternative studio location to produce "live" programming for a radio station's HD2 channel. The facility is outfitted with a green room/lobby overlooking the harbor, a Radio Studio with a beautifully designed triangular microphone console, a Control Room, a wet-bar/kitchen and bathroom. Each element esthetically designed to delight the most discriminating client. All of this capability is housed on the historic LA Harbor Waterfront, with catering and entertainment amenities steps away. Be sure to visit waterfront-la.com for more information on Ports O' Call Waterfront Dining, Spirit Cruises and The Marketplace.

Designed by Radio Veterans, to be the Studio They Always Wanted.

With 3 decades of broadcast experience, it did not take long for Mike Stark to decide just how to fashion a studio that he would be proud to share with his contemporaries. And Jayme Wilson was all to happy to comply! Now that the facility is a reality, Mike has a vehicle to bring his vast knowledge, and new ideas, forward to benefit your every project. We anticipate many media concepts will incubate here, and hope the next one is yours.
